

## GPS MAP 76S

The "S" in the product name stands for "sensors", because the GPSMAP 76S incorporates a GPS receiver, barometric altimeter, and an electronic compass that deliver precise location, elevation, and bearing information to take adventurers as high or as far as they want to go.

The unit also contains Australasian cities, main roads and interstate highways, coastlines, lakes, rivers, railway lines and a database of nautical nav aids, with a huge 24 MB of memory for optional MapSource detailed maps.,

It is also waterproof and floats in water. With its larger screen, increased readability, bigger buttons, and rugged design make this unit at home in even the harshest conditions.

## FEATURES

- Built-in quad helix receiving antenna.
- High-contrast FSTN, gray scale (180 x 240 pixels) display.
- A huge 24 MB of memory for optional MapSource detailed maps.
