

eTrex H

The eTrexH is a compact rugged water resistant GPS. It now has a highly sensitive GPS receiver that acquires satellites faster and lets users track their location in challenging conditions, such as heavy foliage or deep canyons.

It is a 150 gram package that is only 11.2 cm tall and 5.1 cm wide. The result is a unit that will literally fit in the palm of your hand. The eTrexH will run for up to 18 hours on just two AA batteries.

The eTrex will store up to 500 user waypoints with graphic icons and boasts GARMIN's exclusive TracBack™ feature that will reverse your track log and help you navigate your way back home. In addition, the eTrex uses animated graphics that will help you identify your marked waypoints quickly and easily.
