

The eTrex Vista includes a barometric altimeter and electronic compass. It has a high resolution, sunlight-readable colour screen.

It supports an optional microSD card for storage of optional map detail and a toggle button near the screen so it is easy to navigate around the various screens. Double click the toggle button to create one of one thousand possible waypoints. It holds 10,000 track log points.

It has a highly sensitive GPS receiver that acquires satellites faster and lets users track their location in challenging conditions, such as heavy foliage or deep canyons.

FEATURES

- Barometric altimeter provides extremely accurate elevation for hikers and climbers
- Electronic compass so you can get a heading when standing still
- 256-colour, sunlight-readable display makes it easy to distinguish map details and see where you're going
- Support for English, Spanish, Portuguese, and French languages.
- Automatic route generation, off-route recalculation, turn-by-turn directions with alert tones, and icon-driven menus for finding points of interest (when combined with Garmin's optional MapSource® CDs) navigate you safely to your destination
- Longer battery life for more hours of outdoor enjoyment
- Mini-USB port for fast, convenient download of map data from Garmin's entire library of optional MapSource CDs using a PC
